EXPERIENCE

Software Design Engineer, *ERMCO*

05/2025 – Present
Dyersburg, TN

- Design, develop, and maintain internal business applications using VB.NET and the .NET framework, applying object-oriented programming (OOP) and modular software architecture principles.
- Perform software debugging, troubleshooting, code reviews, and testing to ensure application reliability, performance, and scalability.
- Engineer and refactor VBA-driven automation solutions in Microsoft Excel to streamline business workflows, reduce manual processes, and improve operational efficiency.
- Develop and optimize SQL Server queries, stored procedures, and data workflows supporting application functionality and large-scale data migration initiatives.
- Support legacy system modernization efforts, refactoring and enhancing existing applications and macros during enterprise-wide business system migration.
- Utilize Git-based version control workflows to manage source code and support collaborative, agile software development.

Associate Design Engineer, *ERMCO*

01/2020 – 05/2025
Dyersburg, TN

- Contributed as part of the engineering team in design, analysis, and continuous improvement initiatives for electrical transformers.
- Assisted in improving production processes and product performance through engineering analysis and collaboration.
- Managed business system configuration processes, including order configuration updates and system data revisions.
- Provided technical support and engineering consultation to internal teams, customers, and sales personnel.

Electrical Co-op, *Jackson Energy Authority*

05/2018 – 08/2019
Jackson, TN

- Created AutoCAD drawings to support system and infrastructure design projects.
- Assisted engineers in the development of electrical installation and removal plans for commercial, industrial, and municipal facilities.
- Supported project engineers in documentation and design verification for electrical systems.

EDUCATION

Full Stack Web Development, *Vanderbilt University Boot Camps*

10/2023

Grade: 97

B.S. in Engineering (Electrical), *University of Tennessee at Martin*

08/2018

GPA: 3.69/4.0

Martin, TN

TECHNICAL SKILLS

Object-Oriented Programming

Performance Optimization

Troubleshooting

Frontend Development

HTML5, CSS3, Bootstrap, JavaScript (ES6), React.js

Databases

DB2, SQL Server, MySQL

Tools & Platforms

Git, GitHub, Bitbucket, Jira, Microsoft Excel, AutoCAD

Software Debugging

Modular Software Architecture

Code Review

Backend Development

Node.js, RESTful APIs, VB.NET, .NET Framework

Automation & Scripting

VBA (Excel Macros)

Problem Solving
